

Dear Equine Enthusiast,

ALERT! For Quebec:
[Neurotropic Equine Herpes Virus -1 Found in Quebec](#)

SPRING IS HERE - ARE YOU READY?

Spring Brings New Life

Here comes the sun... and the mud and worms and viruses.

Barbara Sheridan Photography

- **Time to vaccinate**- Spring means more travel for some horses which means protecting your horse against diseases they may encounter. But the stay-at-home horse needs coverage too. Learn more about the importance of [core](#) and [optional vaccines](#) for your horse.
- **Rotate Dewormers** - Is your parasite control program effective? University of Guelph researcher Dr. Peregrine discusses [parasite control and growing resistance](#).
- **Stop Slipping and Sliding** - Reduce the risk of sprains and mud fever by taking measures to [reduce mud](#) in paddocks. More information regarding [systems](#) to help manage mud.

Top Seasonal Tips

1. [Customize your Vaccination Coverage](#)
2. [Optimize Parasite Control - Fecal analysis](#).
3. [Check those Chompers](#) - Routine dental care is important for proper digestion. Uneven teeth wear can lead to the formation of sharp edges/hooks, causing pain and impaired chewing capacity.
4. [Limit the 'High Octane Fuel'](#) - Introduce horses and especially ponies to spring grass slowly. Nutrient packed spring grass can lead to [laminitis](#).
5. [Have a Progressive Training Plan](#) - If you are increasing your horses' exercise/workload, remember to make changes slowly. This includes any changes to diet. Sudden changes in diet can lead to colic. Learn more with Equine Guelph's [Colic Prevention Program](#).
6. [Have a Little One on the Way?](#) [Check the vaccines recommended for broodmares and learn when foals receive their first immunizations.](#)

Learn more about [Growth and Reproduction with Equine Guelph's online course](#). Instructor Doug Nash recommends, "applying the latest research and technology available through Equine Guelph to assist Mother Nature in the challenges she faces with our ever-changing environment."
